AWS AI FOR BHARAT 2024

Ayushman AI Companion

Empowering Patients as a Personal Care Copilot

Chirag Kumar

277M+

Chronic Disease Patients in India Face Critical Care Gaps

Adherence Gaps

40-50% medication non-adherence in India leads to poor outcomes and preventable hospitalizations.

Literacy Barriers

Low health literacy and language barriers prevent rural patients from following complex care plans.

Context Loss

Inaccurate history sharing during doctor handoffs compromises the quality of clinical decisions.

AI Care Copilot

Ayushman AI Provides Multilingual, Offline-First Care

Bridging the gap between patients and providers with intelligent, accessible technology.

Multilingual Support

Native Hindi and English guidance to bridge communication gaps for Indian users.

Offline-First Architecture

Reliable functionality in areas with intermittent or low connectivity.

Privacy-First Design

Encrypted local storage ensures sensitive patient data remains secure.

Clinic-Ready Outputs

Automatic generation of structured summaries for professional doctor handoffs.

A 5-Step Guided Journey Streamlines the Patient Experience

1

Onboarding

Simple collection of body basics to personalize AI context.

2

Reminders

Smart medication scheduling with proactive alerts.

3

AI Coach

Multilingual chat supporting text, voice, and images.

4

Handoff

Clinical summaries generated for doctor consultations.

5

Evaluation

Continuous safety testing for responsible AI design.

Smart Reminders Drive Better Medication Adherence

Ensuring patients never miss a dose with proactive, intelligent alerts.

Custom Scheduling

Flexible schedules with specific repeat days and dosages tailored to complex care plans.

Active Notifications

Alarm-style alerts ensure patients take action immediately, even when the app is closed.

Adherence Logging

Simple 'Taken', 'Dismiss', or 'Snooze' actions provide immediate feedback and tracking data.

Pattern Detection

Intelligent identification of missed dose patterns to provide personalized interventions.

CORE FEATURE 02

The Multilingual AI Coach Offers Safety-First Health Guidance

Real-time support that understands context and prioritizes patient well-being.

Input Versatility

Supports natural conversations via text, voice, and image analysis for diverse health queries.

Safety Guardrails

Every response includes educational disclaimers, confidence scores, and urgent-care guidance.

AWS Bedrock Nova Powered

Intent Awareness

Automatically detects medication changes or symptoms from chat to update reminders and logs.

Multilingual Empowerment

Provides immediate, accurate answers in Hindi and English, breaking down literacy barriers.

CLINIC-READY OUTPUT

Provider Handoff Summaries Bridge Communication Gaps

One-tap generation of professional clinical summaries for more effective doctor consultations.

Standardized SOAP Format

Organizes patient data into Subjective, Objective, Assessment, and Plan sections for professional clarity.

SOAP-STYLE

Comprehensive Data Tracking

Includes 7-day and 30-day views of medication adherence, symptom timelines, and red-flag detections.

Structured Data Export

Generates clinical summaries that can be easily shared or integrated into existing healthcare workflows.

RESPONSIBLE AI

Prioritizing Patient Safety and Data Privacy

Non-Diagnostic Framing

Strictly educational guidance; the AI does not provide medical diagnoses or prescriptions.

Escalation Logic

Built-in triggers identify red flags and guide users toward urgent professional care immediately.

Transparency & Confidence

Limitations are clearly stated, and confidence levels are shared for every AI-generated response.

User-Controlled Privacy

Full data control with local encryption and optional cloud sync only when explicitly enabled.

EVIDENCE-BASED DESIGN

Rigorous Evaluation Proves the Reliability of Ayushman AI

Quantitative results from 30+ synthetic test scenarios demonstrate readiness for real-world care.

Safety Compliance

Ensuring appropriate, non-diagnostic responses across all health queries.

PASS

Routing Accuracy

Correct identification and escalation of urgent-care red flags.

100%

Actionability Score

Providing useful, next-step guidance for daily medication management.

HIGH

Continuous Improvement

Built-in feedback loop for constant refinement of AI logic and safety layers.

ACTIVE

Scaling Ayushman AI for Greater Impact Across Bharat

- Patient Empowerment through Daily Adherence
- Clinician Time Saved with Structured Data
- Privacy-First Design with Local Encryption

FUTURE ROADMAP

- Wearable Device Integration
- Caregiver Monitoring (with Consent)
- Expanded Regional Indian Languages
- Integration with e-Sanjeevani Telemedicine
